

R E M A R K S

This reissue application is being filed by reason of the patentees claiming less than they had a right to claim in USP 6,328,658.

One error upon which reissue is based is that the original patent fails to broadly claim the feature of the present invention whereby the units for loading, servicing and unloading passengers are operable during motion of the cabins, as recited in new independent claim 24.

It is noted that issued independent claim 11 recites similar subject matter to new claim 24 with respect to delivery of foodstuffs and accessories during motion of at least one cabin. Nevertheless, issued independent claim 11 includes the unnecessary limitations that the "panoramic wheel is continuously rotatable" and that the at least one cabin is provided with "a separate door aperture" for delivery of the foodstuffs and accessories.

In addition, it is also noted that the subject matter of originally filed claim 3 also recites similar subject matter to new claim 24 with respect to loading/unloading of passengers during wheel rotation. Nevertheless, original claim 3 failed to recite the feature of the present invention whereby the servicing units are operable during motion of the cabins, as recited in new

independent claim 24, and original claim 3 also included the unnecessary limitation that the "panoramic wheel rotates continuously".

Submitted herewith is a STATEMENT OF STATUS/SUPPORT FOR ALL CHANGES TO THE CLAIMS UNDER 37 CFR 1.173(c).
